# ISOC Status

**IOCG, ESOC, 24 Apr 2008 — ISOC Status & AO6**

Peter Kretschmar

ISOC Software

- Roll-angle & pattern stepping between subsequent 5×5 patterns was implemented in Nov 2007.

- Various improvements to tools for observers (PGT, TVP, OTE). PGT now stores data as XML.

- Updated PICsIT energy thresholds (INTGSCCR-87).

- Now preparing for post-TAC improvements.

➢ ISOC Web application (planning info) not running stable. Under investigation; first measures not successful.

➢ Latest Flight Dynamics package continues to give numerical errors at ISOC. Needs to be fixed to resolve several open issues from the past.

AO-6 Results

- Call for AO-6 released **10 March**, deadline **18 April**.

- Problems encountered with PGT (if exit without save) and on last day with Proposal loader.

- **179 proposals** received,
  61 requesting time,
  118 associated to Key Programmes.
  Oversubscription factor: 5.8

- Proposals ready for TAC 23 April. Technical evaluation ongoing.

- TAC Meeting **19-22 May**.
