

ISOC Status

P. Kretschmar – INTEGRAL Mission Manager
INTEGRAL User Group Meeting
ESTEC – 17 June 2011

- Team mostly stable, except for replacement of Marnix Bindels.
- Last year quite busy with implementation of changes in AO scheme (multi-year programmes and change of categories).
- Quite some effort caused by planning issues linked to orbit evolution.

- Major “construction sites” for coming months:
 - AO-9 data right proposals
 - eAIMS (Long-Term Planning tool) improvements – implemented by YGT, now with team developers
 - Possibly: mySpaceCal (view of plans for all HE satellites)
 - Study if shadowing strategy for SPI cooling plates can be improved.
 - Modelling radiation belt exits

- Ongoing: update of documentation and software
- 5 September 2011: Call for proposals (subscriptions).
- **14 October 2011**: Deadline for submission.
One week after XMM deadline.
- Mid November: TAC panel meetings, mostly remote.
- 16/17 November: TAC chair meeting.
