

How to manage data rights/public data in A012?

Erik Kuulkers

IUG Meeting ESTEC – 26&27/11/2013

[INTEGRAL] data rights in AO12

- Up to AO7:
 - All data rights to PI of main proposal
 - If approved targets close to each other → amalgamation
- AO7-AO11:
 - Main target(s) to PI of main proposal
 - Rest of field (sources) propose through Data Rights proposals
- AO12+:
 - Main target(s) to PI of main proposal
 - **NO Data Rights proposals** → **problem**
 - Solutions?
 - Rest of field public? NO (due to coded mask can't discriminate target from rest!)
 - Return to <AO8 situation, but encourage amalgamation by TAC?

e.g., encourage all previous Data Rights proposers to propose through normal round, identify amalgamation candidates before TAC, TAC approves based on goodness of proposal, and finally revisit amalgamation rules
